## About

The Parsons China Summer 2010 Course will mark the fourth year Parsons The New School for Design has collaborated with The Academy of Art and Design at Tsinghua University to run a one-month collaboration in Beijing, China. The course began as a summer class primarily for students in Communication, Design and Technology and has expanded to include undergraduate and graduate students from every academic discipline at Parsons.

Each year the course has focused on different creative and design practices, including the following: exhibition/installation, artistic programming, design seminars, new media/technology, fine arts and hands-on workshops. In the summer of 2006, 1 faculty along with 3 MFA Design + Technology students from Parsons along with faculty and graduate students from Tsinghua University collaborated to create the "Traveler" installation for The 3rd Millennium Dialogue, Code:Blue. The summer of 2007 saw the first full scale Parsons Tsinghua collaboration course with 1 faculty and 25 students from Parsons and 20 from Tsinghua participating in a one-month course interaction design and artistic programming with Processing and Physical Computing.
